

# Central Asia Mountains. Nature Conservation Solutions.

## High altitude

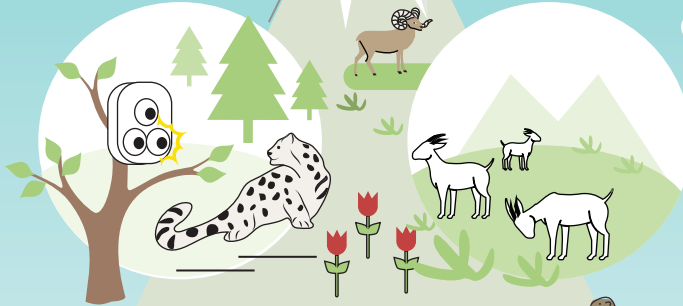

### Migratory species survival

### Overgrazing, pasture degradation

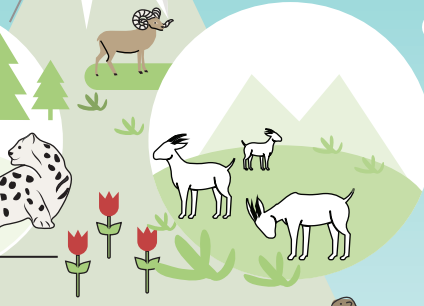

### Protected areas

Feeding wild birds, important bird areas protection

SMART monitoring and targeted conservation

Protection of the endemic and endangered flora and fauna

Nature-friendly grazing regulations

Capacity development

## Middle altitude

### Limited awareness

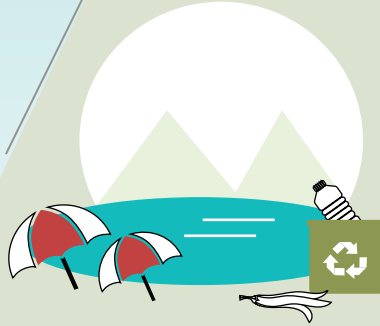

### Environmental pollution

### Poaching

### Infrastructure development

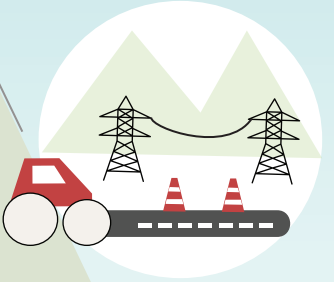

Public awareness campaigns

Waste cleanup and prevention

Environmental inspections and patrols

Responsible planning, green standards

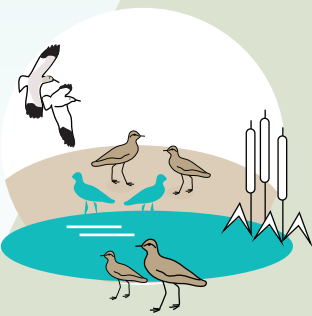

## Low altitude

### Species habitats

### Development of river beds, industrial pollution

### Overuse of nature, agriculture expansion

### Growing pressure from tourism

Monitoring of species, expansion of protected areas, responsible hunting

Mining restrictions, remediation

Development of alternative sources of income

Ecotourism, mass tourism regulations

## Lowlands and oases

### Unique species

### Endangered species

### Pollution and shrinking of water ecosystems

Research, science-based policy and measures

Nurseries, wildlife centers

Ecosystem restoration

River cleanup
